

## Part I: Making the feet

① Begin by folding one chenille stem in half. ② Then make an evenly divided 'w.' ③ Next, securely tie a bit of embroidery floss to the left (or right, it doesn't really matter) of one of the "down points" of the 'w'. ④ Wrap it around the bend neatly, being careful not to let any fuzz show. After wrapping it a bit, go ahead and fold it into a point. ⑤ Continue wrapping both sides of the stem for about 1/4 of an inch. Tie it off. Repeat on the other side.
